

# WHY SHOE BOX SCANNING?

Shoe Box scanning is a high-speed system that allows the staff at Swanlund's Camera to digitize a large volume of your photographs from wallet size 2½ x 3 and enlargements up to 8½ x 11 and put them on a CD or DVD at an incredible low price.

This is a great way to preserve your photographs. You'll be able to share them, and easily make more prints of your treasured family photos. Keep your memories safe by having us make an extra CD or DVD for your Safety Deposit Box.

Remember these are high-speed scans and not like our more higher-end scans which start at \$5.00 per image. Some of your older photographs may require this service. If they are very delicate, Polaroid prints, mounted or some other problem print, they won't be able to go through this scanner, but most pictures will be fine. Please see order requirements for more details.

## ORDER REQUIREMENTS

CONTINUED

**RIGHT**

Photos have been removed from envelopes and sleeving and evenly stacked.

**WRONG**

Photos remain in envelopes, needing to be removed and sorted.

Photos should be submitted right-side up.

Photos submitted upside-down will be scanned and placed on the CD upside-down.

1000 + prints.....	.20¢ each
1500 + prints.....	.19¢ each
2000 + prints.....	.18¢ each

## NOTICE

These high-speed photo scans are designed to digitally preserve your regular photos. This is not designed to archive professional images with museum-quality clarity. We do provide both services and the individual high-resolution scans are \$5.00 each (for photos up to 8½ x 11). High-speed photo scans are just 18 cents each when you provide 2,000 or more photos. There is no refund for high-speed photo scans and you understand and agree that we cannot guarantee the image quality of the reproductions or individual quality control your files due to the extremely high volume scanning operation.

## ORDER REQUIREMENTS

1. Categorize your photos in order of size. Please place the smallest photos on top and the largest ones at the bottom. Largest size print acceptable for high volume scanning is 8½ x 11.
2. We can scan both sides, so if you have handwritten messages on the back, just let us know to scan the backs too. Place those double-sided photos in one stack, separated from the others (these photos would be charged two scans each).
3. Make sure every photo is facing upright. If upside down the scans also will be upside down.
4. Only individual photos can be scanned. If there is any tape, glue or other materials that might impede the scanning we cannot process that photo. If the photos are too thick or for other reasons cannot be scanned we will separate those images and package them separately for you with a notation that those images were not scanned. As a frame of reference, the photograph cannot be any thicker than a standard Polaroid picture. Additionally, no mounted photographs, standard or Polaroid, can be included due to their inability to bend. Photographs must be able to bend with little or no effort.
5. The smallest size that can be scanned is standard wallet size - 2½ x 3 inches
6. We recommend that you use a 4 x 6 index card to divide and sort photos. You can write a message on the card to denote the sequence of your photos.
7. WE CAN ONLY ACCEPT LOOSE PHOTOS. PHOTOS IN ALBUMS OR FRAMES WILL NOT BE PROCESSED.
8. Photos should be fairly evenly stacked in a box.
9. Remember, if shipping your photos; protect it from moisture by wrapping within plastic wrap or aluminum foil.
10. Any preparation that is not done will incur an additional charge(s) to the order.

(CONTINUED)

## OTHER SERVICES

### INDEX PRINTS

- 4 x 6 \$0.99 per 24 images (SBS46)
- 6 x 8 \$1.99 per 24 images (SBS68)
